KPN

NORMAL CHESTNUT EXTRACT

PROPERTIES:

KPN is a natural, the most astringent vegetable chestnut extract, atomised powder of a brown colour and excellent tanning properties. It is characterized by excellent binding with the hide fibres, it imparts to the tanned leather excellent filling properties, compactness, excellent weight yield, water resistance, even colour, high stability to light.

KPN tanned leather is highly wear resistant, is of high buffing and brushing quality and can perfectly maintain its form in that way.

KPN is highly soluble in water and is excellent for mixing with other types of tannins.

PRODUCT SPECIFICATION (FILTER METHOD):

Tannin	75 % +/- 1 %
T/NT	4 +/- 0,1
pH - 6,9 Be	3,5 +/- 0,2

APPLICATION AND ADVANTAGES OF USING IT:

KPN is soluble in tap and hot water, can be used alone or compounded with all types leather tanning materials. It is used in leather process of tanning and retanning, confers to the tanned leather the following characteristics and qualities:

to vegetable tanned leather:

- **excellent compactness and fullness**
- **excellent weight yield**
- **wear resistance**
- **light stability**

to retanned leather:

- **excellent hydrophobic properties**
- **compact grain**
- **excellent buffing and glazing effect**
- **excellent print acceptance and retention**
- **even colour**

PACKAGING:

25 kg bags
