Tansin SG

Replacement syntan for the retannage of white leather.

PROPERTIES:

- white powder, easily soluble in water.
- active substance content minimum 92%
- tannin content minimum 50%
- pH (10% solution) 4,1 +/- 0,2
- excellent light stability

ADVANTAGES OF USING IT:

- for white leather which is highly stable to light
- while retanning, it gives the leather white colour
- the leather grain is soft and compact
- while cracking the grain, the leather ensures even structure
- suitable for the tannage of reptile skins

APPLICATION:

- for the retannage of leather in combination with other tanning materials 3-5%
- in combination with vegetable tanning materials 2-5%
- alone in tanning of reptile skins 20 – 30%

PACKAGING:

25 KG paper bags
