# TANIN oil N

## Special fatliquor for soft leathers

**COMPOSITION:** specially processed natural fats

**APPEARANCE:** light brown paste

### CHARACTERISTICS:

- |                    |           |
|--------------------|-----------|
| • active substance | 60 % ± 1  |
| • pH (10% sol.)    | 6,5 ± 0,5 |
| • light fastness   | good      |

### PROPERTIES:

- emulsified in water
- binds to hides in all situations
- high affinity for the chrome-collagen complex
- good penetration performance
- suitable for soft leathers such as gloving, garment and other soft leathers

### APPLICATION:

The product should be emulsified in three parts of hot water.  
It can be used with any other combination of other fatliquors.

It is recommended to use 6 – 10 % of TANIN oil N depending on characteristics of the leather.

### STORAGE:

Storage at temperature below 5°C or above 35°C must be avoided.
