TANIN oil S

Fatliquor for chrome, semi – chrome and vegetable leathers

COMPOSITION: blend of sulphated vegetable oils

APPEARANCE: brown amber oil

CHARACTERISTICS:

- | | |
|--------------------|-----------|
| • active substance | 75 % ± 2 |
| • charge | anionic |
| • pH (10% sol.) | 7 ± 0,5 |
| • light fastness | excellent |

PROPERTIES:

- excellent softening properties
- in water provides fine emulsion which is quite stable to hard water
- acts in depths, fat-liquoring the entire section of the skin
- suitable for soft skins such as nappa, garment suede, cow skins for »softy« and drummed articles in general
- suitable for upholstery leather

APPLICATION:

The product can be used alone or in combination with other natural oils or sulphitated oils

- | | |
|----------------------|-----------|
| • upholstery leather | 10 – 12 % |
| • velour | 8 – 10 % |
| • limming leather | 8 – 14 % |

STORAGE:

Storage at temperature below 5°C or above 35°C must be avoided.
