TANIN oil T

Fatliquor for chrome, semi – chrome and vegetable leathers

COMPOSITION: special product based on sperm and synthetic oils

APPEARANCE: viscous oil

CHARACTERISTICS:

• active substance	50 % ± 2
• charge	anionic
• stability to electrolytes	poor
• pH (10% sol.)	7 ± 0,5
• light fastness	good

PROPERTIES:

- penetrates rapidly in depth
- recommended especially for furniture, garment and high quality nappa
- gives a soft and elastic leather with low specific weight
- gives brighter colour
- in tanning or retanning improves the softening and the delivery of the tanning substances

APPLICATION:

The product can be used alone or in combination with other anionic, non ionic oils

• nappa	2 – 3 %
• nubuck	2 – 4 %
• vegetable leather	2 – 4 %
• in rapid vegetable tannage	2 – 3 %

STORAGE:

Storage at temperature below 5°C or above 35°C must be avoided.
