Promin F

Auxiliary syntan for selective filling of leather

PROPERTIES:

- white powder, hardly soluble in water,
- active substance content minimum 90 %
- pH (10% solution) 7,5 +/- 1,0
- high light stability

ADVANTAGES OF USING IT:

- *selectively fills the empty areas of the leather*
- *suited for all types of chrome-tanned leather*
- *uniforms thickness while retanning the skins*
- *gives an excellent effect in buffing of leather*

APPLICATION:

- for shoe-upper leather retannage 2-4 %
- for skin retannage 2-8 %
- in a process of fatliquoring 1-3 %

PACKAGING:

25 kg bags
