Promin RFA

Resin for the retannage of chrome leather.

PROPERTIES:

- base: acrylic polymer
- light yellow thick liquor, dissolves in water in all proportions
- anionic character
- total solids 32% +/- 2
- pH (10% solution) 6,0 +/- 0,5
- good light stability

ADVANTAGES OF USING IT:

- ***suited for the retannage of all types of chrome leather***
- ***gives firm and soft leather. It also fills the leather.***
- ***enhances elasticity and resistance to cracking of leather***
- ***gives low specific weight to the finished leather***
- ***is excellent for combining with all types of tanning materials***
- ***prevents grain looseness***

APPLICATION:

- diluted in warm water before adding in drum
- for upper footwear leather 3-4 %
- for upholstery leather 4-5 %
- for clothing and small hides 4-5 %

PACKAGING:

120 kg drums
