Tansin SB

Replacement syntan for the retannage of white leathers.

PROPERTIES:

- light yellow powder, easily soluble in water,
- active substance content minimum 92 %
- tannin content minimum 60 %
- pH (10% solution) 4 +/- 0,2
 - medium light stability

ADVANTAGES OF USING IT:

- *for white leather, which is medium stable to light*
- *gives the leather closed and firm grain*
- *is excellent for buffing and is suited for suede and nubuck leather*
- *can easily be blended with vegetable extracts*

APPLICATION:

- for retannage of leather in combination with other tanning materials 3-5 %
- used alone in retannage process 8-10 %
- for bleaching of vegetable leathers 1-3 %

PACKAGING:

25 kg bags
