# SODIUM ACETATE TRIHYDRATE

## **DESCRIPTION:**

Sodium acetate trihydrate is odourless crystal powder of white or yellowish colour. It is easy to be dried on the open air, flammable, soluble in water and ethanol.

## **PHYSICAL AND CHEMICAL PROPERTIES:**

Appearance:	crystal powder
Colour:	white to yellowish
PH (5% solution)	7,5 – 8,0
Melting point	580 °C
Solubility in water	readily soluble
Purity	99%

## **APPLICATION:**

- In textile industry as a buffering agent
- In leather industry as a pickling agent in chrome tanning
- In tanning industry as a washing salt
- In chemical industry in the manufacturing of diazo compounds
- In food industry as food preservative with E number E262
- As a medium in chemicals heat reservoirs
- In printing and dyeing of textiles as a mordant

## **STORAGE AND HANDLING:**

Sodium acetate should be stored in origin closed packaging in a dry place.

## **PACKAGING:**

25 KG paper bags
