Tansin UN

Universal replacement syntan for the retannage of leathers.

PROPERTIES:

- light brown powder, easily soluble in water,
- active substance content minimum 92 %
- tannin content minimum 55 %
- pH (10% solution) 4 +/- 0,2

ADVANTAGES OF USING IT:

- *it can easily fill the leather and disperse other tannins*
- *it can easily fill the leather grain, that is very soft*
- *retanned leather can easily be buffed*
- *it can be well combined with other vegetable and synthetic tannins*
- *gives the leather uniform and consistent colour*

APPLICATION:

- for the retannage of leather in combination with other tanning agents 5-10 %
- alone in retanning 8-10 %

PACKAGING:

25 kg bags
