Tansin VP

Auxiliary syntan for the penetration and dispersion of vegetable tanning materials and colours.

PROPERTIES:

- a light brown powder, easily soluble in water,
- active substance content minimum 92 %
- pH (10% solution) 7 +/- 0,3

ADVANTAGES OF USING IT:

- *has excellent dispersing effect on vegetable tannins and colours*
- *it perfectly prepares the pelt for rapid and even penetration of tanning agent into the leather*
- *has a good neutralizing effect on chrome leather*
- *enables even arrangement of retanned agents through the whole cut of the leather*
- *can be well combined with vegetable and synthetic tanning materials*

APPLICATION:

- for vegetable pretanning 5-7 %
- for the neutralization of chrome leather 2-3 %
- for even arrangement of tanning materials and colours in leather 2-3%

PACKAGING:

25 kg bags
