PROTAN N

Formulated dicyandinamidic resin tanning agent

PROPERTIES:

- | | |
|------------------------|---------|
| • Physical state: | powder |
| • Active substance: | 94-98% |
| • pH(sol.1:10): | 6 - 8 |
| • Charge: | anionic |
| • Solubility in water: | partial |

ADVANTAGES OF USING IT:

- Improve the fullness particularly in the loose parts of the skins.
- The buffing- and embossing properties are improved significantly.
- Increased fullness, firmness of the grain.
- It provides well fixed dyes and assists in polishability, finishing and the printing of skins.
- Leathers retanned with PROTAN N show a very tight grain with a round feel and can be easily finished.

APPLICATION

- For retanning calf and kid with synthetic, vegetable or chrome salt tanning agents.
- Has no negative influence on the waterproofing if applied in quantities of 3-5% together with the retanning agents.
- Is added undissolved.

PACKAGING:

25 KG paper bags
