TANIN OIL V-55

Fatliquor for full chrome, semi-chrome and full vegetable tanned leathers.

COMPOSITION: sulphited natural oil - lanoline

APPEARANCE: light brown paste

CHARACTERISTICS:

- | | |
|--------------------|---------|
| • active substance | 55% ± 2 |
| • charge | anionic |
| • pH (10% sol.) | 7 ± 0,5 |
| • light fastness | medium |

PROPERTIES:

- due to natural lanolin it confers utmost inner lubrication within the fibre of leather treated with it. Thus it prevents your full vegetable, semi-chrome and even full chrome leather from cracking without making your leather loose,
- has a very good softening quality,
- the leather treated with this oil shows warm handle and a spongy fullness, typical of a lanoline product,
- due to its special components, it impacts pronounced writing effects on nubuck and suede.

APPLICATION:

The product can be used alone or in combination with other fatliquors. It is suitable for shoe upper leather, as well as garment and upholstery leather.

- | | |
|---------------------|---------|
| • fancygood leather | 1 – 3 % |
| • belt leather | 3 – 4 % |
| • sole leather | 1 – 3 % |

Stir well before use: the product may show a physical separation which doesn't affect its properties.

STORAGE:

Storage at temperature below 0°C or above 40°C must be avoided.
