PROTAN C

POWDER EXTRACT

ANALYSES

TANNINS	68- 70%
NON-TANNINS	20-22%
pH SOLUTION 1:10	3.4 - 3.6

PROPERTIES AND APPLICATIONS

PROTAN C is a natural tannin with astringent properties which appears as a light yellow powder, particularly suitable for the retanning of chrome leather for vegetable-based articles.

PROTAN C can be used for all types of chrome retanning, whenever you want to obtain leather with good yield and firm grain and you want to facilitate the passage of more astringent tannins.

PROTAN C is validly used in the retanning phase of chrome leathers to obtain a full leather and a firm grain with excellent fixability and brushability.

METHOD OF USE

In retanning of chrome leathers 3 - 8% on shaved weight depending on the item requested.
