PROTAN QB

NATURAL TANNIN

ANALYSES

TANNINS	69- 73%
NON TANNINS	10- 12%
pH SOLUTION 1:10	4,0 - 5,0

CHARACTERISTICS AND APPLICATIONS

PROTAN QB is a catechinic tannin with a light colour. Among its characteristics we remark the optimal use in the retanning of chrome leather in combination with other plant extracts or synthetic tannins.

PROTAN QB allows you to obtain leather with excellent structure and fine grain.

PROTAN QB is particularly suitable in all cases where color uniformity, rapid penetration and good swelling are required.

METHOD OF USE

In retanning of chrome leathers 2 - 6% on shaved weight.
