# VEGTAN M

## NATURAL TANNIN

### ANALYSES

Total Solids	Min. 92.0%
pH SOLUTION 1:10	4.0 - 5.0

### CHARACTERISTICS AND APPLICATIONS

VEGTAN M is a tannin belonging to the category of condensed tannins.

The characteristic that distinguishes VEGTAN M is its possibility of use both in vegetable tanning and in the retanning of chrome-tanned leather.

The main features of VEGTAN M are:

- a good color
- rapid penetration
- a high fixation of tannins
- rapid dissolution.

VEGTAN M is particularly suitable:

1. In the retanning of chrome leather, to give the leather structure.
2. In all cases where color uniformity, rapid penetration and good swelling are required.

### METHOD OF USE

In retanning of chrome leathers 2 - 6% on shaved weight in combination with other plant extracts.
