VEGTAN Q

NATURAL TANNIN

ANALYSES

TANNINS	72-74%
NON TANNINS	19-21%
pH SOLUTION 1:10	3,2 - 4,2

CHARACTERISTICS AND APPLICATIONS

VEGTAN Q is a light-colored catechin tannin.

Among its characteristics we find optimal use in the retanning of chrome leather

in combination with other plant extracts or synthetic tannins. VEGTAN Q can be used to partially replace the traditional vegetable extracts in the production of full vegetable leather.

VEGTAN Q allows to obtain leather with excellent structure and fine grain.

VEGTAN Q is particularly suitable in all cases where color uniformity, rapid

penetration and good swelling are required.

METHOD OF USE

In retanning of chrome leathers 2 - 6% on shaved weight.
